18 yrs

enterprise technology

80+

apps moved to Oracle Cloud

£500k

annual OPEX saving

3,000+

integrations secured

PROFILE

I find where a business process is breaking — the workarounds, the handover gaps, the hidden risk — and turn it into something that works.

Over **18 years in enterprise technology**, I have coordinated specialist teams through high-stakes cloud and security change, and co-led **Priority 1 incident response** for seven years.

I also build. I design and ship **working tools** that replace chaotic manual workflows with structured ones.

I do my best work where the problem is real, the outcome matters, and I can own it from **diagnosis to delivery**.

WHAT I BRING

UNDERSTAND

Find where the process is **really** breaking — workarounds, dependencies, hidden risk.

IMPROVE

Redesign the workflow, bring the **right specialists** together and make change **safe to land**.

BUILD

Ship the tool myself — or **coordinate the team** that does.

SELECTED IMPACT

- **Cloud migration** — Costly colocation estate. Moved **80+ enterprise applications** from Equinix to Oracle Cloud with a **10-specialist team**. **£500k annual OPEX saving**.
- **Process fix** — Changes failing in production. Introduced **pre-change checks** that **almost eliminated failed or rolled-back changes**. Adopted by the team.
- **Security overhaul** — Legacy HTTP/FTP links exposing customers. Migrated **3,000+ integrations** to HTTPS/SFTP, and built and tested a **middleware disaster-recovery site**.
- **Crisis response** — **WannaCry cyber attack**. Coordinated urgent patching of **hundreds of servers** and kept clients informed, within **7 years co-leading P1 outages**.
- **Built the fix myself** — A music team drowning in group messages. Designed and shipped **Genesis**, a scheduling platform with availability matching, set lists, lyrics and charts. **Used repeatedly without prompting**.

EXPERIENCE

Founder, Product Builder & Freelance Producer

Self-employed

Feb 2024 – Present

Greater Manchester, hybrid

Deliberate move to build products and upskill, supported by freelance and trade work.

Products

- **GraceCast** (in testing) — Small church teams can't staff a camera crew. Building an **AI-assisted console** so **one volunteer** can produce broadcast-quality livestreams from a single camera.
- **Genesis** — Live cloud platform with **secure sign-in**, availability matching and shared set lists, plus a **demo, walkthrough and documented repository**.
- **REACH charity website** — A children's charity on a legacy **WordPress** site. Rebuilt as a fast **Astro + Tailwind** site with **automated deployment** and a **serverless contact form**. **No plugins or PHP to maintain**.

Freelance

- **Violin/piano wedding duo** performing across the **North West**.
- **Composer, Cavendish Music** — music used in **Amazon Prime** documentary The London Underground Killer.

Technical Delivery & Cloud Migration

e2open · Full-time · Senior Applications Specialist

Aug 2008 – Feb 2024

Salford, hybrid

- Enterprise logistics SaaS used by **3,000+ organisations**. Worked across network, infrastructure, database and security engineers to **land complex change safely**.
- **Ran the migration rhythm** — **Chaired progress meetings** and **allocated work** across network, database, application and security specialists for the Oracle Cloud move.

- **Customer programmes** for **Heineken UK** and **Sysco UK (Brakes)** — VPN and firewall readiness, data-exchange validation, monitoring and operational acceptance.
- **Improved how the team worked** — Redesigned escalation, runbooks and handovers. **Adopted by the team.**
- **Change control** — Assessed risk at CAB. **Stopped unsafe changes** under pressure when notice or specialist cover was lacking.
- **P1 incident process** — Assembled specialists, ran the technical bridge, kept customers and senior leaders informed, and **verified recovery.**

Clients included: Heineken, Sysco (Brakes), **Aviva**, **Legal & General**, **ASDA**, Dunelm, **PZ Cussons**, **TNT**, **Nisa**.

IT Managed Services Engineer

iRevolution & UKN Group · Full-time

2006 – 2008

London, on-site

- **High-security, live environments** — Managed IT services for **NHS sites**, **Lloyd's of London**, the **Really Useful Group** and a **UK government agency**.
- **Fault diagnosis on site** — Hardware, network and connectivity faults, fixed with **minimal disruption**.

Session Musician, Pro Tools Programmer & Assistant Engineer

Sarm Music Village

Mar 2002 – Oct 2006

London

- Played and programmed for producer **Trevor Horn** on **GRAMMY- and Oscar-nominated** projects: **Shrek 2**, **Seal**, **Kylie Minogue**, **Sugababes**, **Enrique Iglesias** and the **2004 Olympic Torch Theme**.

ADDITIONAL EXPERIENCE

General Building Labourer & Carpenter's Mate

CDCS Trade Support · Self-employed

May 2026 – Sep 2026

Greater Manchester, on-site

- Domestic refurbishment for a builder and a carpenter — **RSJ installs, drylining, strip-out and timber fitting**. Worked **safely in live customer homes**. CSCS carded, CIS registered.

VOLUNTEERING

- **Sound Engineer & Community Befriender, Connect Café** (weekly, current) — Run live sound, serve food and drinks, and befriend guests to **reduce isolation**.
- **Assistant Producer, Gaydio** — Breakfast show imaging, including a **Denise Van Outen** takeover. Produced a **BBC Children in Need** podcast, editing content to **family broadcast standards**.
- **Charity Event Producer** — Coordinated venues, production, musicians, crews, charities and marketing on tight budgets. Raised **£2,000+** for doctor training in **Uganda**, plus a **Ukraine** fundraiser.
- **Web & Digital Marketing, Rotary International** — Websites, posters and social campaigns for District 1180.

SKILLS, TOOLS & EDUCATION

Core skills: Process improvement · Technical delivery coordination · Change control (CAB) · P1 incident coordination · Requirements & user journeys · Prototyping · AI-assisted development

Tools: Python · JavaScript · Astro · Tailwind CSS · GitHub Actions (CI/CD) · Cloudflare Workers · Bash · Oracle Cloud Infrastructure · VPN & firewall · HTTPS / SFTP · Pro Tools

Certifications: PRINCE2 Foundation · CompTIA Security+ · freeCodeCamp Web Design · TryHackMe Cyber Security

AI toolkit: **Claude Code** and **ChatGPT Codex** to build, **Perplexity Pro** to research — fast, low-cost fixes.

Education: BMus (Hons), GRNCM — 2:1 · Royal Northern College of Music

WAYS I CAN HELP

- **Untangle a messy process** — find the workarounds, bottlenecks and hidden risks.
- **Turn needs into a clear plan** — workflow, requirements or a lightweight product spec.
- **Coordinate the build** — bring the right specialists together and land change safely.
- **Build the prototype myself** — test a practical tool before bigger investment.
- **Strengthen operations** — incident handling, runbooks, handovers and clear ownership.

HOW I THINK

- **I see the system, not the symptom.** Where others patch the fault, I fix the process behind it.
- **I connect worlds others keep separate.** Studio, cloud, crisis response, product — each sharpens the others.
- **I go deep, fast.** Unfamiliar problems pull me in. I learn what's needed and get to a **working result**.
- **I stay calm when it's on fire.** Major outages are where I think most clearly.
- **I say what I see.** Clear, honest communication — including **stopping a change** when the risk isn't right.

I do my best work with: Clear written priorities · Defined ownership · Space for focused problem-solving
